

Fw: Seattle Iron and Metals Air Monitoring project

Margaret Mccauley to: Kris Flint, Lisa Olson

History: This message has been replied to.

Ms. Olson, just FYI. I instigated this based on conversations with Ed Abbasi and Bob Wright about data needs for the next permit. That conversation similiarly influenced the EPA NPDES sampling locations - parts of the site that are not currently going to the treatment process.

Ms. Flint, please let me know if you have any interest and capacity to join in the conversation on design of this effort.

Both, if there are others you think should know about / be involved, please forward as you see appropriate.

Margaret,

I have briefly talked with Jed Januch and we are planning to coordinate together on this work. I have two upcoming State audits that I need to prepare for and conduct. One is mid-June and the other is at the end of July. I can probably devote some time to your project over the next couple months (mostly research and planning I would guess) but I suspect the field work portion would not happen until August or September, depending on Jed's schedule and the scope of this study (yet to be determined). The three of us should probably meet at some point in the near future to develop a game plan. I am fairly open the next two week and out June 14-18. Lets first hear back from Jed and then set up a meeting based on his availability.

Jed,

Are you planning to be at the regional office over the next two weeks and would you have time to meet with Margaret and me regarding this project?

Thanks, Chris

Margaret Mccauley thanks! yes, Jon did the NPDES inspection and...

thanks! yes, Jon did the NPDES inspection and I am the compliance officer for it, so we have been working together. I am glad that you are aware of what we are doing.

Do you have a timeline for the OEA air investigation?

Sincerely,
Margaret McCauley
